

For complete and accurate testing of Residual Current Differentials

A new generation of testers!

RCD tester

- 🖌 Cat. III 600 V
- ✓ Large backlit LCD screen with 2 x 4000 counts and a wide range of ondicator icons
- ✓ Immediate error free connections thanks to mains connection lead
- ✓ Alarm and date-time memory functions (100 measurements)
- ✓ Optical fibre communication:
 - direct printing on serial printer
 - data transfer of memory to PC (transfer application software supplied as standard)
- ✓ Supplied with "hands free" carrying strap

- Automatic voltage and frequency testing of installation
- Tests on standard, selective, A and AC type differentials:
 - 5 predefined calibres (10 / 30 / 100 / 300 / 500 mA) and one calibre ajustable from 6 mA to 650 mA
 - non-tripping test
 - tripping time measurement (pulse or ramp mode) and exact tripping current (ramp mode)
- Power-on earth measurements: earth loop and power-on loop with 1 auxiliary rod
- Current and leakage current measurement using clamp
- Phase rotation order test (2 or 3-wire)

RCD testing / earth loop / live earth (1 rod) / phase rotation / current clamp

Innovative and particularly convivial, the C.A 6030 RCD tester combines optimum ease of use with enhanced metrological performances for the testing of protection systems and compliancy of installations with european and international standards (NF C 15-100, IEEE, VDE 0100, NIN / NIV, VE EN-1).

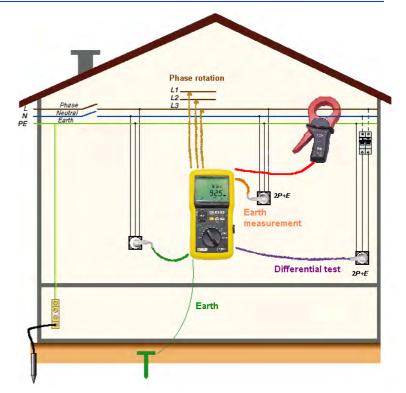

The C.A 6030 is quick and easy to set-up: it connects directly and safely to installation mains, with automatic permutation of L and N inputs if conductors are reversed at socket connection.

The measurement is selected by simple use of the rotary switch and launched by pressing on TEST. The result is then displayed on a large backlit screen.

A wide range of functionalities are accessible by direct fingertip control: activation of alarms, date / time recording fof results and/or direct printing of measurement readings using serial printer, back-lit display screen...

These combined advantages place the C.A 6030 among the forerunners of a new generation of testers!

Another advantage: the data transfer application software is supplied as standard.

 Voltage / frequency measurement 	automatic upon connection to installation: from 2 to 550 V (DC or RMS) / from 15.3 to 450 Hz		battery level/ autonomy
	- I∆n = 10 – 30 – 100 – 300 - 500 mA - Adjustable : 6 mA to 650 mA - non-tripping test: at ½ I∆n	P	stand-by deactivated
 Differential test 	 tripping time measurement: at IΔn, 2 IΔn, 5 IΔn, 150 mA, 250 mA tripping current / time measurements: ramp from 0.51.06 IΔn, in 3% increments 	R _∆ →0←	lead compensation
	- fault voltage: 5.0 to 50.0 V by calculation I∆n x RE - short-circuit current: displayed up to 40 kA by calculation IK = UREF / ZL-PE	•1))	programmable alarms
 Earth loop / live earth 	 by RCD test without tripping and without tripping using 1 auxiliary rod: from 0.1 to 4000 Ω calculation of fault voltage and short-circuit current 	MEM	memory
Current measurement	using clamp connections 20 A (MN20 & C172) or 200 A (C174)	COM	communication on
 Phase rotation order 	on installation frequencies from 15.3 to 64 Hz and voltage 90 to 550 V using conventional method (3 wires) or sequential method (2 wires)		memory used level

To order

1 mains lead

1 3-wire lead

C.A 6030 RCD Tester (Euro)

3 test probes / 3 crocodile clips

1 user's manual in 5 languages

1 communication lead

1 data transfer application software

Supplied with "hands free" carrying strap and accessories bag:

Accessories

General specifications

- Power supply: 6 x 1.5 V batteries or rechargeable batteries
- Complies with standards EN 61010-1 and EN 61557
- Electromagnetic compatibility (EMC) rating EN 61326
- IP 54 Dimensions: 211 x 108 x 60 mm ; Weight: 900 g
